

# Top cutter

## For pros who are cost-conscious and work efficiently

The top cutter has two cutters at each side, which feature high-alloyed stainless steel blades. This ensures very high cutting quality, avoids fraying of the foliage and the cutter does not become jammed.

Thanks to the new 'tube in a tube' system, an extraordinarily narrow drive width is achieved on the roads. Nevertheless, it can work in row widths of 1.60m to 2.80m.

The low oil requirements of 10 litres and horizontally arranged blades with fixed axle and separate oil drive motor ensure the greatest stability and a long service life.

This means the top unit is ideally suited for bearing spraying or mulching equipment. You therefore save time and fuel and also preserve the environment.

# One and two-sided post drivers

## Quick and powerful

freilauber's hydraulic post drivers assist you when newly planting or replanting your vineyard. It is especially effective when using wooden or metal posts.

### Important facts at a glance

- Available in one or two-sided variants
- The base frame is the same one as used with the vine trimmer, de-leafer and pre-trimmer

### The rod pincers

- For pulling up old vines
- Simply suspended from the post driver
