# Pre-pruner Type VS06

**Fast, light and stable - the titan among pre-pruners**

Thanks to its special hydraulic system, Freilauber's pre-pruner works extremely quickly and cleanly. Due to its rapid opening and closing times, only very few vines remain on the post.

## Important facts at a glance

- Light yet stable construction: the materials used are able to absorb powerful forces
- Can be fitted to any mast (even from other manufacturers)
- The vertical distance between two cutting discs is easy to adjust, thereby enabling a variable cutting pattern
- The base frame with six discs can be expanded to up to 12 discs
- Short changeover time when altering the cutting length
- Optional: Automatic control for opening for steel posts
- Can be used directly after harvest
- Weight from 90kg

# Pre-pruner PLUS

## Fast, robust and enormously powerful - another titan among pre-pruners

Thanks to its special hydraulic system, freilauber's pre-pruner works extremely quickly and cleanly. The rapid opening and closing times at the piles result in high speeds and only very few vines remain on the post.

### Important facts at a glance

- Thanks to its extremely robust construction, it can absorb powerful forces, meaning it is also suitable for timber that is several years old
- Sturdy cutting discs thanks to the use of high-tensile steel and specially manufactured bevelled cutting edges
- The base frame with six discs can be expanded to up to 14 discs
- Optional: Automatic control for opening for steel posts
- Can be used directly after harvest
